KONDHANOLLA MANIKESH

Hyderabad, India | 9347105354 | kondhanollamanikesh@gmail.com | LinkedIn

CAREER OBJECTIVE

Computer Science undergraduate with hands-on experience in Python, Java, Machine Learning, Generative AI, LangChain, LangGraph, and FastAPI. Interested in building AI-powered applications, intelligent recommendation systems, and production-oriented backend solutions. Strong analytical and problem-solving skills with a willingness to learn and work on emerging technologies.

EDUCATION

B.Tech – Computer Science and Engineering 2023 – Present | Pursuing
TKR College of Engineering and Technology, Hyderabad

Intermediate – MPC 2021 – 2023 | 94.4%
Sri Chaitanya Junior College, Hyderabad

SSC 2021 | 100%
Sai Ram Convent High School, Hyderabad

TECHNICAL SKILLS

Programming: Python, Java, SQL
AI & Machine Learning: Machine Learning, Deep Learning, NLP
Generative AI: LLMs, LangChain, LangGraph, RAG, Prompt Engineering
Backend & APIs: FastAPI, REST APIs
Databases: MongoDB, MySQL
Frontend: HTML, CSS, JavaScript, React.js
Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

PROJECTS

Multi-Agent Career Digital Twin & Future Simulation Platform

- Developing an AI-powered career platform for resume analysis, job recommendations, skill-gap identification, learning recommendations, and interview preparation.
- Designed a multi-agent architecture using specialized agents for career intelligence tasks.
- Integrating LLMs, LangGraph, FastAPI, MongoDB, and vector search for processing resumes, job descriptions, skills, and career goals.
- Developing career what-if simulations to evaluate potential career paths based on skills, certifications, and technologies.

AI Technical Chatbot

- Built an AI-powered technical chatbot using LLMs, LangChain, and LangGraph for answering technical questions.
- Developed a React-based interface with authentication, chat functionality, and conversation history.
- Implemented backend services and REST APIs for user management and chat processing.
- Designed tool-based AI workflows for retrieving and processing relevant information.

YouTube Video Q&A; Chatbot

- Developed an AI-powered chatbot that enables users to interact with YouTube video content through natural-language questions.
- Implemented transcript extraction, text chunking, embeddings, and Retrieval-Augmented Generation (RAG) for context-aware responses.
- Used LangChain and vector search to retrieve relevant sections of video transcripts.
- Built an interactive interface for submitting YouTube links and querying video content.

Lung Cancer Prediction System

- Developed a Machine Learning application to predict lung cancer risk using symptom and lifestyle-related features.
- Trained a Random Forest Classifier and integrated the model with a FastAPI REST API.
- Built a React-based interface for collecting user inputs and displaying prediction results.
- Connected the machine learning model with the web application through backend API integration.

ACHIEVEMENTS

- Solved **180+ Data Structures and Algorithms problems** across **LeetCode** and **GeeksforGeeks**.
- Practiced problem-solving across arrays, strings, linked lists, stacks, queues, trees, graphs, recursion, greedy algorithms, and dynamic programming.

SOFT SKILLS

Analytical and Problem-Solving Skills | Critical Thinking | Communication | Adaptability | Initiative and Responsibility
